GENERAL INFORMATION

Frank Fox has aimed at retaining the size and milking ability of the Dual Purpose Shorthorns established by his father. He has added depth of body and thickness with the Polled Scotch Shorthorns. The cow herd today is fantastic—big roomy cows with great udders that have produced great beef calves as you will see on sale day.

Other bulls you will note in this catalogue as sires are NUPAR METEOR X, a homebred bull that weighed 2450 lbs. when he was sold to a breeder at Riverhurst, Saskatchewan at 6 years. His son, NUPAR COMFORT X, is sire of many of the calves. He is a 2400 lb. bull out of a Jack Hassard cow. This bull was sold to Lloyd Newton who lives near Grimshaw, Alta. Another bull whose calves are selling is NUPAR CHERRIO. This bull was bought in dam from J. W. Lawrence, Meskanaw, Saskatchewan.

Never before has the opportunity been presented where you can buy so many Polled Shorthorns of such excellent bloodlines and with the size and milking ability of this herd. Don't miss this sale.

L. W. Thieman.
Susan Kaye 2nd X-2349147- Roan, W. Hale.

You will have noted the picture of this bull's sire at the top of this catalogue. The Thieman cattle are really famous the world over and are doing a great job everywhere. This 16th bull is a big framed bull with tremendous bone. He has been in heavy service and certainly isn't carrying much fat but he is every inch a stock bull. Breeders everywhere should give a thought to getting this bull working in their herd.
